

OVERVIEW

This solid high performance juicer showcases Kenwood's new patented APEX technology. 'Advanced Pulp Extraction' ensures most of the waste pulp ends up in the collector and does not create build-up in the lid or rim – less mess and cleaner juicing. Other features include an XXL metal feed tube and a patented anti-drip spout. Kenwood quality is assured with a solid die-cast metal body and heavy duty 1000 watts.

FEATURES

- > Heavy duty 1000W power
- > Patented APEX technology
- > 85mm wide metal feed tube
- > Patented anti-drip system
- > 1.5 litre capacity juice jug with froth separator
