

## JE850 EXCEL CENTRIFUGAL JUICER

### EFFICIENT APEX TECHNOLOGY

Patented 'Advanced Pulp Extraction' technology provides cleaner juicing, ensuring most of the pulp goes into the collector and does not stick to the lid and rim = less mess.

### PATENTED ANTI-DRIP SYSTEM

Reduces mess when the juice jug has been removed for pouring and stops the build-up of juice within the body of the unit.

### XXL METAL FEED TUBE

Measuring 85mm wide, whole fruits can be placed through the feed tube.

### LARGE PULP COLLECTOR AND JUICE JUG

3L pulp collector allows more fruit to be processed at once before emptying, plus a large 1.5L juice jug with froth separator for clean pouring.

### HEAVY DUTY 1000W MOTOR

Ensures the toughest fruits and vegetables can be juiced with ease.

### DIE-CAST METAL BODY

Sturdy die-cast metal body with non-slip rubber feet to keep the product stable on the kitchen bench.

### 2 SPEED CONTROL

Dial control with two speeds for soft and hard fruits / vegetables.

### EASY TO CLEAN

Pulp collector comes with a unique wipe-clean lid. Parts are dishwasher safe and a brush is included to clean the filter.

## JE850 EXCEL CENTRIFUGAL JUICER

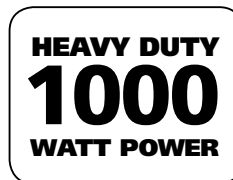

This solid high performance juicer showcases Kenwood's new patented APEX technology. 'Advanced Pulp Extraction' ensures most of the waste pulp ends up in the collector and does not create build-up in the lid – less mess and cleaner juicing. Other features include an XXL metal feed tube and a patented anti-drip spout. Kenwood quality is assured with a solid die-cast metal body and heavy duty 1000 watts.
